Infrastructure Project Justification										Exhibited wording	Proposed changes	
9					1					The exhibited DCP uses an incorrect land value methodology that is not consistent with the PLEM as stated.	In order to demonstrate a value for the contribution per net developable area and the effects of the newly costed bridge designs, within the Part A submission there is an indicative Summary of charges table (Table 1 of the DCP). This table is subject to change once the land valuations have been re-costed and consistent with the PLEM methodology.	MPA
14	2.31									The road projects are for arterial road construction, less pavement works and works for controlled intersections and associated works	The road projects are for connector road construction, less pavement works and works for controlled intersections and associated works	14 - PSCA
29	6.2- Glossary									Spelling error - Acitivty Cent res	Activity Centres	MPA
										Old costing sheets	Replace old bridge designs /costings with SPIIRES revised costings	MPA
