File Naming Structure

CARMS No.]_a.pdf = Audit Report

The first PDF (CARMS_a.pdf) will contain a copy of the audit report including key figures, maps and tables. It will also include a signed copy of the certificate or statement of environmental audit. A certificate or statement may not be required in all instances and traditionally only applies to audits of potentially contaminated sites.

[CARMS No.]_b.pdf = Audit Report Appendices

The second PDF (CARMS_b.pdf) will contain all relevant appendices and attachments that support the audit report, including remediation and monitoring plans, assessors' reports, CUTEF reports, any bore/pit data etc.

[CARMS No.]_c.pdf = Summary of Statement or Certificates

The third PDF (CARMS_c.pdf) will contain an additional extract copy of the signed environmental audit certificate or statement and an executive summary.

Disclaimer

Environmental auditors who have conducted an audit pursuant to section IXD of the Act provide the information contained in this list to EPA. EPA does not conduct independent checks on the accuracy of this information. Anyone with a particular interest in a property should make his or her own further enquiries. EPA does not accept any responsibility for any claims, loss or damage of whatsoever kind arising out of any party's reliance on any information contained in or omitted from this list, nor does EPA accept responsibility for any claims, loss or damage arising out of the inclusion of any property on this list.

AMENDMENT C55 PART1

Priority Sites Register

Date Generated 23/05/2012

BACKGROUND

EPA has a key responsibility in protecting beneficial uses of land. Many of these uses are regulated or controlled through a range of measures to prevent contamination of land and groundwater. Land contaminated by former waste disposal, industrial and similar activities is frequently discovered during changes to land use - for example, from industrial to residential use. In most cases these can be managed at the time that the change of land use occurs. Some sites however, present a potential risk to human health or to the environment and must be dealt with as a priority. Such sites are typically subject to clean-up and/or management under EPA directions.

WHAT ARE PRIORITY SITES?

Priority Sites are sites for which EPA has issued a Clean-up Notice pursuant to section 62A, or a Pollution Abatement Notice pursuant to section 31A or 31B (relevant to land and/or groundwater) of the Environment Protection Act 1970. Typically these are sites where pollution of land and/or groundwater presents a potential risk to human health or to the environment. The condition of these sites is not compatible with the current or approved use of the site without active management to reduce the risk to human health and the environment. Such management can include clean-up, monitoring and/or institutional controls.

The Priority Sites Register does not list sites managed by voluntary agreements or sites subject to management by planning controls (eg. sites managed in accordance with a section 173 agreement under the Planning and Environment Act 1987). Land purchasers should be aware of these limitations and make their own enquiries. A site is listed on the Priority Sites Register when EPA issues a Clean-up Notice or a Pollution Abatement Notice (relevant to land and/or groundwater). A notice is a means by which EPA formalises requirements to manage pollution. Sites are removed from the Priority Sites Register once all conditions of a Notice have been complied with. This is formalised through a Notice of Revocation pursuant to section 60B of the Act.

Subject: Re: HS69 Fw: Dangerous goods licence

Hi Miles,

Yes, a record of any DG storage and handling licences for a given location can be supplied. To request this please email the Licensing Branch at licensing@worksafe.vic.gov.au and include a letter of permission from the site owner.

Should you have any further queries or issues, feel free to contact the WorkSafe Advisory Service on 1800 136 089 or 03 9641 1444 or visit us on the web at <http://www.worksafe.vic.gov.au>.

Licensing information and advice is prepared in the context of the information you have provided in your email. Whilst care has been taken to provide accurate information and advice, we have not endeavoured to advise on all possible contingencies and therefore not intended for other situations or circumstances, as this may affect this advice.

Prior to acting upon any information or advice offered by Licensing, you will need to consider your individual circumstances to determine the application of the advice to any additional statutory obligation or duty relevant to your query.

Kind Regards,
Blair Larsen

Subject Dangerous goods liscence

Hello,

I am doing a site history search on two Growth Areas Authority PSP areas and was wondering if it is possible to view any dangerous goods licences for the properties of enquiry. In a similar project last year, it was found that written permission would be required by each landowner. Please let us know if this is still the case.

Kind regards,

Miles Calder BSc (Hons) Physical Geography

Site photographs

Photograph 1: View of buildings and plastic totes at 770 Summerhill Road (parcel 502093), facing east.

Photograph 2: View of buildings and silo at 860 Summerhill Road (parcel 502097), facing northeast from Summerhill Road.

Photograph 3: View of abandoned building at 920A Summerhill Road (parcel 501955), facing west from unpaved track off Brookville Drive.

Photograph 4: View of market garden greenhouses at 185 Brookville Drive (parcel 501726), facing southwest from Brookville Drive.

Photograph 5: View of buildings and silos at 750 Donnybrook Road (parcel 397661), facing southeast from Donnybrook Road.

Photograph 6: View of olive grove at 185 Brookville Drive (parcel 501726), facing west from Brookville Drive.

Photograph 7: View of fallow market garden field on 810 Summerhill Road (parcel 502095), facing northwest.

Photograph 8: View of olive trees and drums on 770 Summerhill Road (parcel 502093), facing northeast.

Photograph 9: View of aboveground tanks and drums on 770 Summerhill Road (parcel 502093), facing east.

Photograph 10: View of storage bins, debris and an aboveground storage tank on 30 Amaroo Road (parcel 501722), facing northwest from Amaroo Road.

Appendix F

Geotechnical category of investigation

Geotechnical category of investigation (Look, 2007)

Table 1.6 Geotechnical category (GC) of investigation.

Geotechnical category	GC1	GC2	GC3
1. Nature and size of construction	Small & relatively simple – conventional loadings.	Conventional structures – no abnormal loadings.	Large or unusual structures.
2. Surroundings	No risk of damage to neighbouring buildings, utilities, etc.	Risk of damage to neighbouring structures	Extreme risk to neighbouring structures.
3. Ground conditions	Straightforward. Does not apply to refuse, uncompacted fill, loose or highly compressible soils.	Routine procedures for field and laboratory testing.	Specialist testing.
4. Ground water conditions	No excavation below water table required.	Below water table. Lasting damage cannot be caused without prior warning	Extremely permeable layers.
5. Seismicity	Non Seismic	Low seismicity	High Seismic areas.
6. Cost of project	<\$0.5 M (Aus – 2005)		> \$50 M (Aus – 2005)
7. SI Cost as % of capital cost	0.1%–0.5%	0.25%–1%	0.5%–2%
8. Type of study	Qualitative investigation may be adequate.	Quantitative geotechnical studies.	Two stage investigation required.
9. Minimum level of expertise	Graduate civil engineer or engineering geologist under supervision by an experienced geotechnical specialist.	Experienced Geotechnical engineer/ Engineering geologist.	Specialist geotechnical Engineer with relevant experience. Engineering geologist to work with specialist geotechnical/tunnel/ geo-environmental engineer/etc.
10. Examples	<ul style="list-style-type: none"> • Sign supports • Walls < 2 m • Single or 2-storey buildings • Domestic buildings; light structures with column loads up to 250 kN or walls loaded to 100 kN/m • Some roads 	<ul style="list-style-type: none"> • Industrial/ commercial some buildings • Roads > 1 km • Small/medium bridges 	<ul style="list-style-type: none"> • Dams • Tunnels • Ports • Large bridges & buildings • Heavy machinery foundations • Offshore platforms • Deep basements

- Services searches are mandatory prior to ground truthing.
- Further service location tests and/or isolations may be required on site. Typically mandatory for any service within 3 m of the test location.
- Utility services plans both above and below the ground are required. For example, an above ground electrical line may dictate either the proximity of the borehole,
