

REF: V190790

DATE: 27 October 2020

Planning Panels Victoria

1 Spring Street

Melbourne VIC 3000

Attention: Mr. Tim Hellsten (Panel Chair)

Dear Sir,

RE: AMENDMENT C243 TO THE HUME PLANNING SCHEME – PANEL HEARING

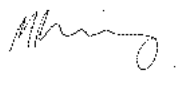

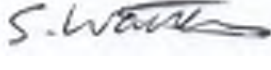

We refer to the Planning Panels Victoria direction for an infrastructure costings and bridge design/economic and infrastructure contributions conclave to be convened as part of the Amendment Hearing. The experts have completed the meeting as directed by the Panel with a summary of the meeting details provided in the following table.

Date / Time	16 October 2020 from 10am to 12pm
Attendees:	Justin Ganly - Deep End Services (JG); Lance Weatherell - WT Partnership (LW); Rob Howard - Hatch (RH); Mark Fleming - Beveridge Williams (MF); Matt Ainsaar - Urban Enterprise (MA); Stephen Watters - SMEC (SW); Jason Black - Insight Planning (JB); Mark Breuer - Spiire (MB); Mark Whalen - GHD (MW)

Item	Description	Discussion
1.1	Preliminaries	Attendees noted there were 2 different but allied topics, infrastructure costings and bridge design, and economic and infrastructure contributions and they break up into 2 separate Teams meetings, allowing an agreed amount of time and reconvene. Two separate summaries would be produced and signed and combined in this summary. ITEM OUTCOME NOTED
1.2	Participants	The meeting for economic and infrastructure contributions was attended by JG, MA and JB. The meeting for infrastructure costings and bridge design was attended by LW, RH, MF, SW, MB and MW. ITEM OUTCOME NOTED
2	Key Issues	It was noted that the supplementary levy was substantially higher than other ICPs, and the key reason for the high cost was primarily related to the two bridges crossing Jacksons Creek and approach roads. The key ICP projects discussed were:

Item	Description	Discussion
		Northern Bridge Design and Costings (LD-BR-01) and the approach roads Southern Bridge Design and Costings (SS-BR-01) and the approach roads Intersections LR-IN-01 and LR-IN-02 ITEM OUTCOME: All Agreed
3.1	Bridge LD-BR-01	It was noted that the current 490 metre span steel bridge is a very expensive option. The rates adopted were generally agreed upon except for the rock earthworks rate which would be further investigated by all parties, who would report back. Upon review, a rate of \$55.00 per cubic metre for excavation in rock and disposal was adopted ITEM OUTCOME: All Agreed
3.2		MW noted the current design was produced following instruction by the VPA and sought to minimise disturbance to the creek and surrounding areas. ITEM OUTCOME NOTED
3.3		A super T structure over 490 metres using 35 metre spans would be a significantly cheaper structure but would require further piles in the Creek valley. ITEM OUTCOME: All Agreed
3.4		Having reviewed the ICP cost estimate for LR-BR-01, MB discussed two alternative bridge alignments that could be considered (Options A & B as per MB's expert report). It was agreed that cheaper options for a northern bridge crossing were feasible. MW felt that the Spiire option A solution intruded slightly into the 100 flood extent, and all agreed that this could be rectified during detailed design. ITEM OUTCOME: All Agreed
3.5		MB pointed out that the current ICP road gradeline on the west side of the creek was 19m above the natural terrain, and that this would not work in relation to the permitted subdivisional works at this point. It was discussed that the gradeline would need to be lowered to the natural terrain at that point. ITEM OUTCOME: All Agreed
3.6		The Spiire option A solution longitudinal grade on the eastern escarpment would likely require a climbing lane to be included. The ICP currently includes a climbing lane. ITEM OUTCOME: All Agreed
4.1	Bridge SS-BR-01	The bridge would be constructed by a gantry at deck level as the valley is steep. The costs of this solution are included in the cost estimates ITEM OUTCOME: All Agreed
4.2		MB presented two alternative bridge vertical alignments that resulted in shorter bridge deck (240m

Item	Description	Discussion
		length bridge compared to the ICP design of 315m length) which would result in less expensive construction. It was agreed that the shorter bridge lengths were feasible. ITEM OUTCOME: All Agreed
4.3		The alignment for the Spiire option B will enable some additional land to be released for subdivision. Due to the difference in height between proposed super T's and central steel girder, a panel should be added to the super T's to provide a continuous profile or if feasible revert back to a 100% super T structure. ITEM OUTCOME: All Agreed
5.1	LR-IN-01 and LR-IN-02	The allowance for service relocations shown in the SMEC estimates should be included ITEM OUTCOME: SW, MW Agreed. Other attendees not involved
5.2		In LR-IN-01 a transition back to the existing road should be included. Additional kerbing required by DoT should be included. ITEM OUTCOME: SW, MW Agreed. Other attendees not involved
5.3		SW questioned the pavement composition assumption relating to the ICP cost estimates. While pavement compositions and traffic loadings may differ, the nett effect on the pavement costs is thought to be similar, however the earthworks quantities should be reviewed to allow for a deeper pavement. ITEM OUTCOME: SW, MW Agreed. Other attendees not involved
5.4		The extent and financing of culverts crossing the road downstream of the MWC retarding basin in LR-IN-01 should be confirmed with MWC to determine whether it is included in a drainage scheme. If not included in the drainage scheme, the ICP cost estimate would need to cover the cost of these culverts crossing Lancefield Road and the eastern leg of the intersection. ITEM OUTCOME: All agreed
5.5		The extent of Kerb & Channel and concrete paths was questioned by SW, as was other miscellaneous items such as dam filling. The differences between estimates was attributed to a higher level of detail being available in the SMEC estimates. It was proposed that SW and MW reconvene with their designers to confirm the scope of work for LR-IN-01 and LR-IN-02 and the cost outcomes. ITEM OUTCOME: SW, MW Agreed. Other attendees not involved
