**Subject:** Precinct Structure Plan - Wildlife Preservation and Walking Tracks

**To Whom It May Concern,**

I am writing to express my concerns and suggestions regarding the Precinct Structure Plan for the area, specifically the stretch of land opposite [REDACTED].

### **1. Preservation of Native Flora and Fauna**

Having resided at the above address for almost 10 years, I am aware that the small patch of land in question is home to a variety of indigenous trees and shrubs that provide critical habitat for local wildlife, including a range of birds. In the past few months, I have even heard the rare call of a grey butcher bird, and then sited it in this location. Over the past two years, I have heard at least two different frog calls – including the distinctive call of the Pobblebonk frog. What a rare delight!

### **2. Inclusion of Walking Tracks**

I urge the planning authority to incorporate additional walking tracks throughout the precinct. Well-designed walking paths not only promote healthy lifestyles but also enhance community connectivity and appreciation of this vulnerable natural environment.

By prioritizing the preservation of native habitats and walking tracks, we can create a more sustainable and vibrant community that values both ecological integrity and human health.

Thank you for considering these suggestions. I look forward to seeing positive developments in the Precinct Structure Plan.

**Sincerely,**
