Victorian Planning Authority

Melton East PSP Submission

To the Responsible Officer

I [REDACTED]
am the Owner of Properties located
at 107 and 28 WaterReserve rd Grangefields
Description PCA 1 Sec7A V/L 9832/647
CA SEC 8A V/F 10618/032 LOT 3 PS
are subject to impact by the Draft Melton East PSP.

I am concerned that the proposed major road dissects my property causing fragmentation of my long held village vision for my land holdings.

I am the daughter of Italian immigrant parents who came from an Italian Village to Australia
My daughter, her husband and their two children / my grandchildren and I live on our land, wishing to create a village on our land one day.

The village that I dream of has scope for homes for multigenerational families like mine where the oldest generation is cared for and the youngest generation will be secure in knowing that there is a home for them to grow up in, and that there will also be a home for them when they marry and have children, and those in between will work within the village and from home.

My dream is to preserve the folklore that it takes a village to grow a child and to say goodbye to an elder.

This folklore requires post office , market stores, an early to whole of life learning precinct, a health centre, a makers precinct and a village farm, all surrounded by forest and fields and supported by regenerative soils, water, air, biodiversity, carbon sequestration and treatment systems sustaining us all.

Our village will be walkable, and have access to shared mobility when we need to go around and beyond our village for supplies, trade and the usual needs of village life found elsewhere.

The planned arterial road cutting my 4hact into three portions will remove my opportunity to prototype my village dream in 2026-2030.

I trust that the Victorian Planning Authority will be considerate of assisting me to create my village on my land at Grangefields Melton East PSP.

My long held dream is consistent with and even advanced the VPA Plan Victoria 2050 vision for revitalised ecologically regenerative villages throughout Victoria. Let us do this together.

I commend the VPA and successive Victorian Governments for seeking to alleviate the many problems created by the metropolitan urban model with its dependence upon the automobile and far away employment, health and education.

I look forward during the immediate period of the Melton East PSP being resolved to commencing nature farming on my Grangefields Farm.

I welcome an opportunity to meet with VPA staff to share my Nature Village concept.
Thanking you very much in anticipation

Respectfully
