

Project: Bendigo Regional Employment Precinct

ID	Q1 Name	Q2. Email	Q4. Submission	Date
[REDACTED]	[REDACTED]	[REDACTED]	<p>As a resident [REDACTED] I am expressing concerns that our street will become a heavily trafficked thoroughfare for people in transit to and from work as well as trucks and other large machinery. Currently our farming zoned street is already over used by companies like ASQ with trucks causing noise pollution and a serious danger to residents with the speed and frequency they travel up the street. As is stands I do not feel safe to enjoy the country farming lifestyle that is expected from a farming zoned area by being able to ride my horse out up the street due to the dangerous manner in which people travel up my road. Increasing the traffic with this project leaves me with concerns for my safety to continue to enjoy riding my horses safely within the boundary of my home with increased traffic, truck and noise pollution.</p> <p>It will also increase the fire risk to the street given that the council does very little to maintain the road side in the area an increase in traffic come with an increased risk of cigarette butts being thrown from cars, sparks from trucks and trailers, cars pulling over on long dry grass. These are all increased risk factors when developing an area that will increase traffic through a farming zoned community. How will the council propose to ensure trucks are restricted from thoroughfare travel and impact to residents is minimised. What measures will the council introduce to mitigate the increased fire hazard risk with increased traffic.</p> <p>Powers road has many young family's who's children enjoy walks and bike rides of an evening, how will the increased thoroughfare traffic be mitigated so that these children can continue to enjoy their outdoor activities together during a time when people will be travelling home and through our street after work?</p> <p>I look forward to hearing your plans to address each of my concerns. We live in a farming zone to enjoy the peaceful rural lifestyle and are concerned that the noise pollution and impact from the precinct on the farming zones adjacent may not have been considered</p>	13/01/2026
