[REDACTED]	[REDACTED]	[REDACTED]	<p>Thank you for the opportunity to comment on BREP - the major concern I have is with the additional heavy vehicle traffic this will bring using the intersection of Calder Highway and Calder Alternative Highway in the centre of Marong and the intersection of Calder Highway and Allies Rd. These two intersections are very busy with heavy transport vehicles daily and mixed in with local traffic it can be dangerous especially at school pick up/drop off times. I also have some concerns with Salvazzera Rd being included in this plan, even though it says this will be for local traffic who may be using BREP for employment, I would like reassurance that this will not become a "rat run" type exit for trucks using it to come back onto the Calder Highway on route to Bendigo, thereby avoiding the main township.</p> <p>Although this plan states that traffic lights will be required, there is some doubt about fully funding these I believe. I note that the BREP will be responsible for part funding but I cannot see full funding being realised within my lifetime. I would like to see some reassurance from Government that the BREP's traffic needs will be fully funded. Good and timely communication with the local community is essential as I am not sure that the community is fully aware of the effects this project will have on the community.</p>	3/2/2026
