Department of Transport and Planning

13 February 2026

Dear [Redacted]

Further to DJAARA's Statement of Cultural Significance (6 November 2025), we wish to submit an additional recommendation:

That the potential effects of light, sound, air and waste pollution generated from BREP be restricted to mitigate any negative effects on cultural heritage, wildlife, the environment, and people.

The justification of this recommendation is reflected in DJAARA's Statement of Cultural Significance (2025), particularly in relation to interfaces with Wilson's Hill Bushland Reserve, Dry Creek and Marong Cemetery, and will be further detailed in a Cultural Values Assessment currently being developed.
